Risk scores are calculated by determining the Likelihood and the highest Impact score from the PESTELO categories. An overall risk score is determined by using the matrix at Appendix A.

The **risk tolerance** is set at risk rating of 13 (**yellow**)

- All risks above the risk tolerance (that is critical, high and medium-high) are reported to the relevant Executive Board.
 - Controls, assurances and actions aim to bring risks within the risk tolerance.
 - External issues may raise inherent risk likelihood or impact.
 - Some risks may be accepted above the risk tolerance level where it is considered unrealistic or unaffordable to bring the risks within tolerance.
-
- **Critical** and **High** risks are key issues requiring immediate and on-going management attention to embed and maintain controls, assurances and actions that will reduce likelihood and/or impact.
 - **Medium-high** risks are significant issues requiring attention to reduce likelihood and/or impact.
 - **Medium** risks are less significant but need to be monitored to capture any increase in the inherent risk position.
 - **Low** risks require no special action.
